

Parents... we need your help!

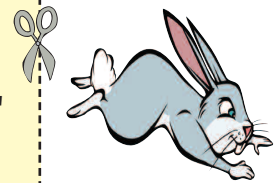

Our proofreaders missed a couple of errors.

Page 13

On page 13 there is only one rabbit and there should be two.

Dr. Don suggests you do one of the following:

- Cut out the rabbit and glue it next to the first one ...or have your child do it.
- or • Have your child draw in the book a picture of a rabbit.
- or • Say to your child, "Dr. Don made a mistake on page 13. See if you can find it, and how would you correct the mistake?" (Add a rabbit, or change the 2 to 1.)

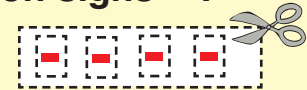

Page 89

On page 88-89: For the question at the bottom of each page, the addition signs $+$ should be subtraction signs $-$.

Dr. Don suggests you do one of the following:

- Cut out the enclosed subtraction signs and glue them over the two addition signs.
- or • Take a magic marker and replace the $+$ signs with $-$.

Page 124

Page 124-125: Your child may need these additional shapes to complete the activities on pages 124-125.
